

ESC Statement on the War in Ukraine

4 Mar 2022

In the light of the continued aggression against Ukraine by the leaderships of the Russian Federation and Belarus, the European Society of Cardiology (ESC) has temporarily suspended the memberships of the Russian Society of Cardiology and the Belarussian Society of Cardiologists in the ESC.

Individuals based in the Russian Federation or in Belarus are excluded from active participation in any ESC event or activity.

The ESC very much regrets the effect this may have on individual Russian and Belarussian cardiologists and scientists, but the message to Russian and Belarussian leadership must be distinct and unequivocal.
